

TF-H3 Manual Thermostat

A classic manual thermostat with a dial, operating in heater temperature control mode – underfloor heating. It is used for electric underfloor heating. The thermostat is flush-mounted in a junction box. The set includes an underfloor temperature sensor.

Technical Specifications

Supply voltage	120–240 V AC 50/60 Hz
Power consumption	< 2 W
Sensor	NTC B3950 10K
Maximum load	16 A
Adjustment of temperature tolerance	±1 °C
Temperature range	5°C – 35°C
Degree of protection	IP31
External dimensions	84 × 84 mm
Dimensions excluding the frame	57 × 57 mm
Installation instructions	Flush-mounted

Key features

- Intuitive operation via a dial
- Manual adjustment of the floor temperature
- Anti-freeze function
- Mechanical temperature range limitation
- The option to temporarily lower the temperature
- Retaining settings when the power is switched off
