

TF-H5 Wi-Fi Thermostat

The TERMOFOL TF-H5 WiFi is a state-of-the-art thermostat for precise control of infrared heating. It features a clear LCD display, schedule programming, and both manual and automatic modes. Thanks to its WiFi connectivity, it also allows remote control of the heating via a smartphone app.

Technical Specifications

Supply voltage	230 V AC 50/60 Hz
Power consumption	< 2 W
Sensor	NTC
Maximum load	16 A
Accuracy	±0,5 °C
Temperature range	5°C – 35°C
Wi-Fi control	Yes
Modes	manual and automatic
Degree of protection	IP20
External dimensions (including the frame)	85.5 x 85.5 mm
Dimensions (excluding the frame)	59 x 59 mm – the back fits most standard 55 mm frames.
Colours	white black
Installation instructions	Flush-mounted
