

Termofol TF-H6 Wi-Fi Thermostat

A modern thermostat for controlling underfloor heating, featuring a backlit touchscreen LCD display and a Wi-Fi module for remote control (TERMOFOL Smart, Tuya Smart). It allows you to programme a weekly schedule, has manual and automatic modes, an anti-freeze function, a child lock and energy consumption monitoring. It protects the system from overheating and alerts you to sensor faults.

Technical Specifications

WIFI

Supply voltage	230 V AC 50/60 Hz
Sensors	built-in air temperature + floor temperature NTC
Maximum load	16 A
Accuracy	±0,5 °C
Temperature range	5°C – 35°C
Hysteresis	0,5-2,5 °C
Hysteresis of the external sensor	1-9 °C
Modes	manual, automatic, holiday
Degree of protection	IP31
External dimensions (including bezel)	82 × 82 mm
Dimensions (excluding the frame)	55 x 55 mm – the back fits most standard 55 mm frames.
