

TF-H7 SMART WIFI Thermostat

The TF-H7 WiFi provides precise heating control, whilst also displaying information on the weather and air quality (PM 2.5), and features a humidity sensor. Equipped with a colour screen, it allows for remote control via WiFi. It is compatible with TERMOFOL Smart apps, ensuring maximum comfort and energy savings.

Technical Specifications

WIFI

Supply voltage	90–240 V AC, 50/60 Hz
Sensor	NTC 10k + humidity
Maximum load	16 A
Temperature control range	5°C – 35°C
Temperature display range	1°C – 70°C
Accuracy	±0,5°C
Degree of protection	IP31
Displayed on a colour screen	Weather PM 2.5 Humidity
Overall dimensions	90 × 90 mm
Dimensions excluding the frame	60 × 60 mm
Installation instructions	Flush-mounted
